22x PTZ Camera with Patent Pending Long Range Laser Infrared Illumination Technology 6,500 Feet Day and 3,200 Feet Night

The LAS Series of cameras from Aventura, is an exciting revolutionary advancement in surveillance solutions. Long-range infra-red imaging using laser technology allows observation, detection and optional auto-tracking of detailed images and objects up to miles away. The patent pending independent laser technology allows the user to control the concentration and direction of the light array ("Searchlight Technology"). Standard configurations feature electronic zooms and communicate RS-485 with support for Pelco-D/Extended protocol. Optional video content analytics adds a proactive element deterring threats before they occur.
